

***Time & Attendance Software***

## TNA Soft : Time & Attendance Software

TNA Soft provides end-to-end management of time and attendance, from the integration of end-user data collection devices to the complete automation of your company's attendance policies. TNA Soft allows Centralized Data Processing from different locations spread over a Wide Area Network. Multiple users granted with various rights & permissions can be created for security.

TNA Soft also has capabilities of creating multiple shifts in various patterns. This feature gives flexibility of work timings for different employees. The employee-punch that is being processed by the system will be verified with the predefined timings of that particular employee. It keeps track of all the data, which is processed from the Data Collection Devices.
