

### Screen Customization

ePad-vision provides total control over customizing the LCD display output to match whatever your business needs.

- Modify compliance and affirmation text
- Select an eSignature background image
- Upload rotating marketing slicks
- Change the eSignature color, thickness, and location

### Low Total Cost of Ownership

The firmware, passive stylus, and writing surface of ePad-vision can be easily and inexpensively replaced in-field.

### Future-Proof Your Investment

ePad-vision comes bundled with IntegriSign Desktop software, which offers plug-ins for capturing eSignatures in Acrobat, Word, Excel, and Outlook documents. No matter how your project evolves, ePad-vision will serve your business needs today and tomorrow.

ePad-vision extends the capabilities of an electronic signature device. This latest addition to ePadLink's ePad family not only captures secure, legally-binding eSignatures, but it also allows you to display full-color, targeted marketing messages that help your customer-facing representatives cross-sell effectively. The selectable onscreen check boxes and response buttons make it easy for customers to opt-in to special offers and products, while also enabling you to obtain important customer feedback. With an advanced, innovative technology, the versatile ePad-vision is a powerful electronic signature solution.

### Capture eSignatures: Create Unique Backgrounds

ePad-vision allows you to customize your eSignature capture screen with full-color graphics. Define the color, thickness, and location of the eSignature to be in perfect harmony with your chosen background image.

In addition to offering a beautiful eSigning experience, ePad-vision works in tandem with the IntegriSign® Desktop software to provide secure and reliable eProcesses. When you present compliance and affirmation text on the ePad-vision screen, you ensure customers make informed decisions. IntegriSign Desktop, bundled at no extra cost with every ePad-vision, securely binds and embeds the electronic signature into the document.

### Capture Revenue: Market Effectively

The USB-powered ePad-vision is the perfect customer-facing tool, both in-house and in-field. Capitalize on the onscreen real estate and use ePad-vision's stunning image quality to present targeted ads, rotating marketing messages, promotional offers, and invitations to enroll in special programs. Customers can respond instantly, enabling you to close sales and generate increased revenue on-the-spot.

### Capture Data: Get Closer to Customers

The bi-directional, interactive display permits users to accept compliant and affirmation text, as well as respond to onscreen customer surveys. Leverage the ability to use response buttons and check boxes to capture useful and actionable customer information.

## Application Examples

### Financial Services

- Account Opening
- Loan Origination
- Credit Card Application
- eMortgages
- eNotarization
- Account Changes
- Cross-Sell Effectively

### Healthcare

- Delivery Confirmations
- Credit Card Applications
- Cross-Sell Additional Services

### Internal Processes

- HR Documents
- Expense Reports
- Invoices
- Estimates & Quotes
- Purchase Orders
- Proposals
- Engineering Work Orders

## Software Developer Kit (SDK)

With the ePad-vision .NET assembly and COM SDK, your IT experts can develop multiple-step eProcesses that control your intricate display parameters, including onscreen presentation specifications and control of bi-directional communication.

### Key SDK Features:

- **Implement eProcesses:** Upload XML code to create your customized presentation process.
- **Multiple Fonts & Colors:** Select from more than 20 fonts to present text in a variety of styles. With a palette of 64,000 available colors, you can also develop interfaces that are appealing to customers.
- **Scrollable Text Boxes:** Program scrollable text boxes that allow users to easily read through information and signing-specific text.
- **Onscreen Surveys:** In order to obtain valuable customer feedback, input onscreen surveys that can be presented to customers during the eSigning process.
- **Selectable Options:** Utilize the ePad-vision widgets that enable creation of customer opt-ins or selections via check boxes, response buttons, and radio buttons.
